
Plate valve metal valve

Design Advantage:

- 1.Multimedia Grooves ——— Large flow area, low loss of the valve
2. The double damping design ——— low impact when opening and closing
3. The tilt motion of the valve is low ——— low impact speed, long life
4. Strong buffer spring ——— resistance to oil viscosity
5. Soil Resistance ——— Resistance to liquid and impurities and oil viscosity, high reliability

Suitable Area:

- 1.The condition of medium-high pressure
2. Medium-low speed condition, rotation rate < 1000 rpm
3. Different designs for Oil and Non-Oil condition
