
ring valve for light gas compressor

Design Advantage:

1. Wide grooves, wide sealing surface ——— Better airtightness and flow performance , energy conservation
2. Low valve lifts ——— Decrease the valve plate tilting movement, reducing impact force of the valve plate , long life
3. High performance impact resistance of PEEK valve plate ——— low loss of the valve seat and valve plate , low noise
4. Sturdy spring ——— low stress and long life
5. Optimum design of the valve bonnet ——— Resistance to oil and viscosity

Suitable Area:

1. Small Molecular weight $MW < 8$
2. Low medium pressure condition
3. Oil / Non-Oil condition
